

High Level Summary Action Plan & Indicators June 2024

Sector: Buildings

Top 3 Priority Actions	How	Activities underway	Indicators
1. Taking part in Future Ready Homes 2 (FRH2)	<p>Members of the Subgroup will offer to take part in a number of meetings with the FRH2 team to help scope and support the project.</p> <p>Greener Footprints to promote this scheme alongside the Home Energy Savers scheme</p>		% new buildings zero carbon by 2030
2. Association for Environment Conscious Building (AECB) approach to pragmatic retrofit	<p>Association for Environment Conscious Building (AECB) approach adopted across the County. To form the basis of all communications and advice. Herefordshire Council (HC) can try and promote the AECB approach where it fits within the various funded schemes.</p>		% new buildings zero carbon by 2030
3. Hold an annual home energy / retrofit fair to raise public awareness and promote benefits of zero carbon, healthy buildings	<p>Address the lack of effective, clear, non-technical guidance and information available to the public. Annual home energy/retrofit fair to take place with talks, show-how and exhibits. This would comprise a day primarily for householders, and a day or half-day for building professionals.</p>		% new buildings zero carbon by 2030
4. Support and enable availability of 'fabric first' retrofit skills training, including working with low carbon and traditional building materials	<p>Promote training that is already happening in the county e.g. the Enhanced Retrofit Fabric Improvement Training Course at NMITE University. Hold joint event with Sixth Form College and HC at Holme Lacy in 2024.</p>		% new buildings zero carbon by 2030
