Business Energy Advice Service

The Business Energy Advice Service (BEAS) is a programme designed to help businesses save money and drive growth by providing free energy assessments and 50% match-funded grants.

Grants of up to £100,000 are available for energy efficiency projects (£50,000 for renewable energy projects).

There is **no payback required**, and BEAS is part of a broader government initiative aimed at reducing carbon emissions nationwide.

BEAS is administered by the West Midlands Combined Authority with support from Local Authorities across the West Midlands. For Herefordshire, Shropshire, Telford and Wrekin and Worcestershire, the programme is being administered by Worcestershire County Council.

Business Energy Advice Service

BEAS can help businesses fund energy improvements such as:

- Improved Refrigeration
- Building Insulation
- Water management
- Recycling & Waste (compactors, balers & crushers)
- Ventilation (fans, distribution, destratification fans)
- Heating (replacement boilers, burners, heat pumps)
- Energy-efficient lighting (LED, controls, sensors)
- Solar panels
